

PORTFOLIO

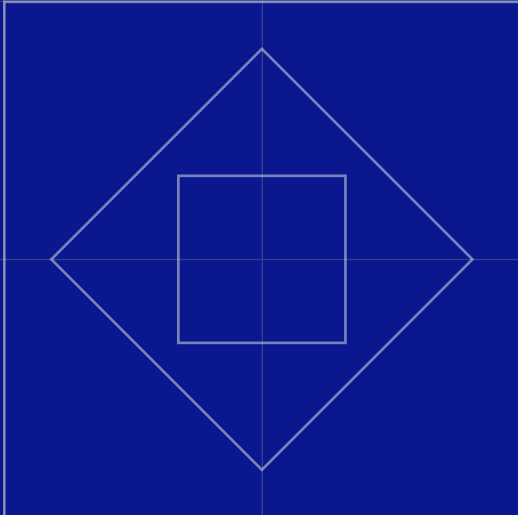

About Us

We are Imazitech.

We are a team of talented individuals performing, Design, App & Web Development, Video editing, Social Media Management, Advertisement and Branding. We have worked in it for for some brands which you will see further in our portfolio.

WORK

Logo Design

We have designed logos for some businesses and companies. The ones on this page are some mock concepts. Next page represents some of the logos designed for clients.

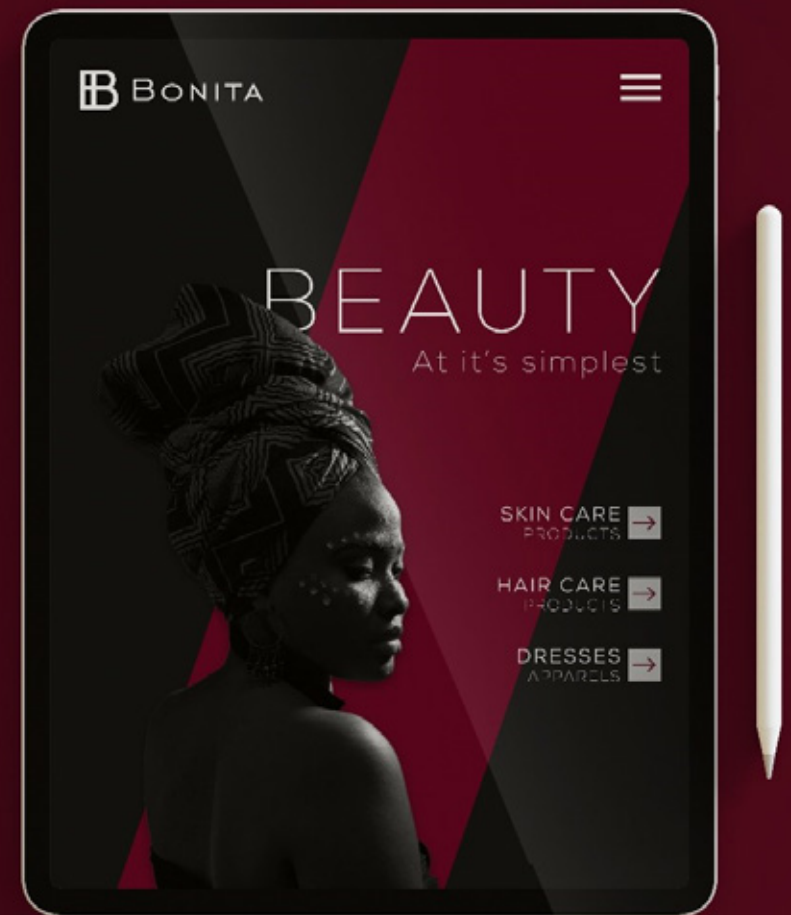

Logo Design for clients

UI/UX Design

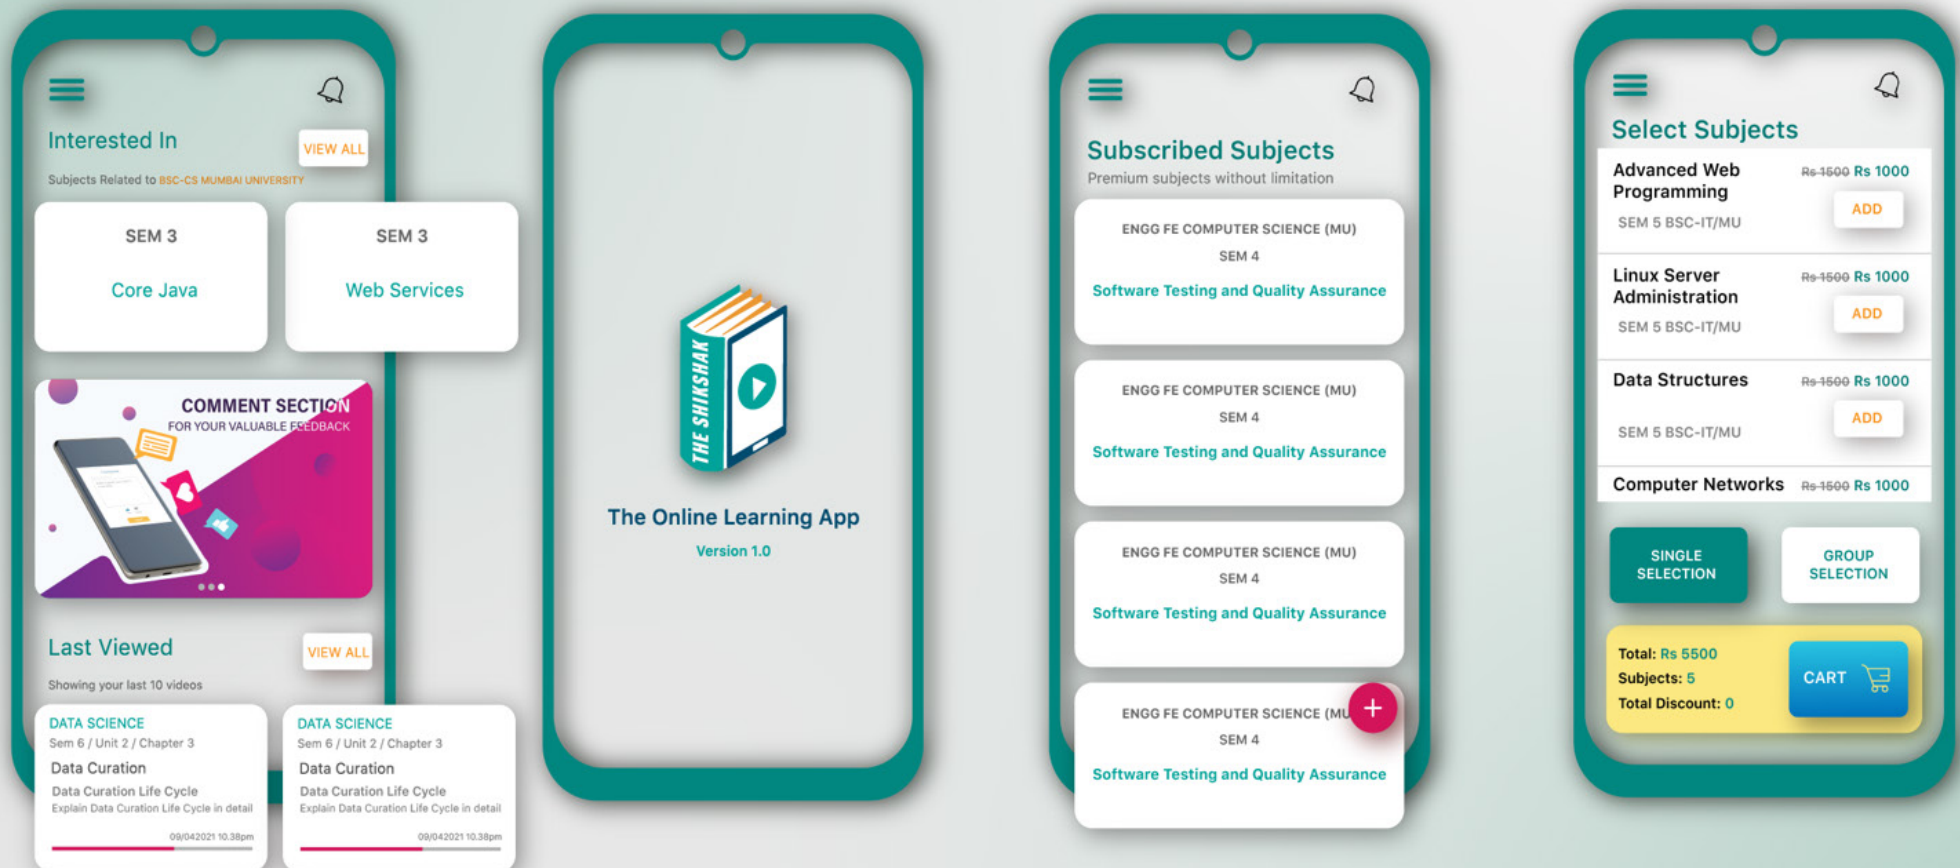

We have designed applications and websites for a few clients. You will also find them on playstore and the web too. The concepts on this page are just mockups we designed for a few landing pages. Next page shall show you our UI/UX projects for clients.

UI/UX Design for clients

'The Shikshak' is a mobile application specially built for students and learners wanting to learn concepts of Information Technology and Computer Science. With their own convenience, students can even learn their entire syllabus from anywhere and anytime.

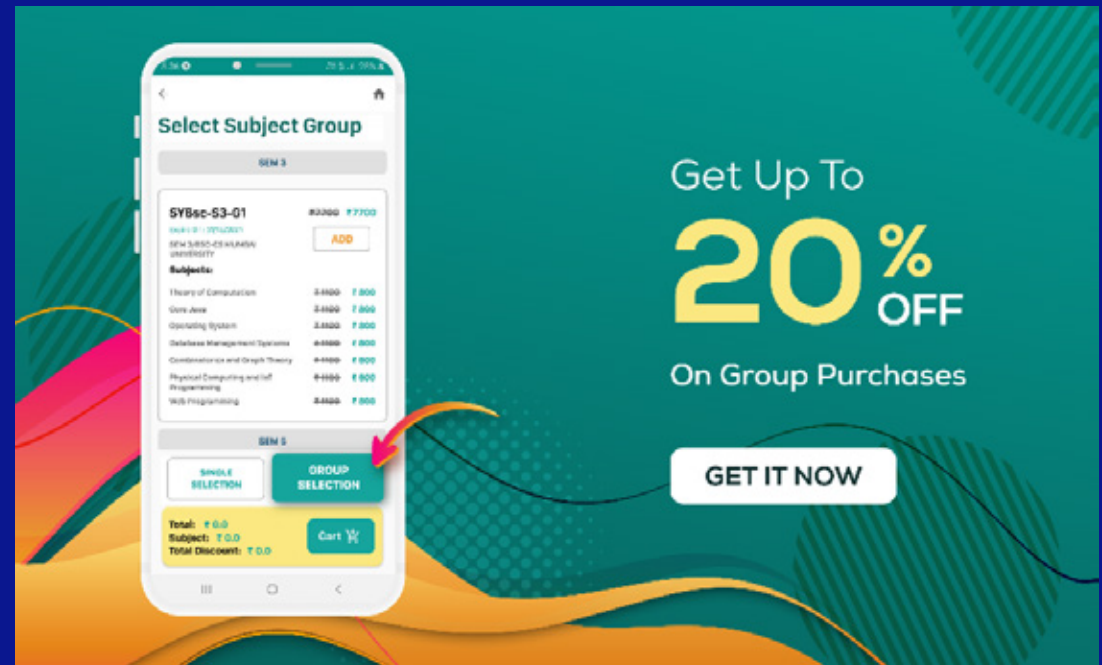

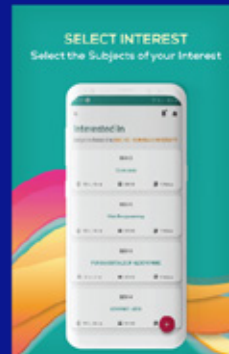

Album Art Design for clients

Designed Album Covers for some fresh music artist

Mobile App Design And Development

Why from Us ?

Hummingbirds are birds native to the Americas and comprises the biological family Trochilidae. With about 360 species, they colour more closely to Tanager and Parrots, but the most majority of the species are found in the Americas. They are small birds, only about...

Crafting the visuals

Just for information, each visual you see in the previous and next slides is carefully created from scratch in photoshop. The gentle representation of each ingredient, placement and relation of the product with the ingredients, environmental lighting and shadows to make it look realistic; and last but not the least, portraying the message to the viewers. These are few of the stages of creation which help in making viewers feel the product through these visuals.
